Please specify who owns the copyright for this article

The answer to this question will tell our system whether you are authorized to sign this form yourself, or if you will be required to obtain another signature in order to legally transfer or retain copyright.

Contributor-owned work

This is the correct selection for most authors. It is customary in most academic and healthcare institutions for faculty to retain copyright for articles that they have authored. Please check whether different policies apply in your institution.

U.S. Government work

Applies only if your work was authored as part of your official duties as a United States federal government employee; such works are in the public domain in the US.

U.K. Government work

Applies only to employees of the U.K. Government.

Non-Governmental Organization work

Applies only if the work was carried out during the course of employment by a Non-Governmental Organization.

Other Government work

Applies only to government employees outside of the U.S. and U.K.

Company/institution-owned work

This does not typically apply to most universities and academic institutions. Applies when an organization, often a commercial corporation, owns the copyright of a work either because there is a specific clause in the author's contract of employment that states the company/institution's ownership of its employees' intellectual property, or it has been contracted ('made for hire').

A person is silhouetted against a bright opening in a cave. The cave walls are wet and glistening, with water dripping from the ceiling. The lighting is a deep, ethereal blue, creating a dramatic and mysterious atmosphere. The person is standing on a rocky ledge, looking towards the light. The overall scene is dark and atmospheric, with the blue light highlighting the textures of the cave walls and the water.

A person is standing in a cave, illuminated by a bright blue light. The cave walls are wet and dripping with water, creating a shimmering effect. The person is silhouetted against the bright light, which appears to be coming from an opening or a large waterfall in the distance. The overall atmosphere is mysterious and dramatic.

Article is eligible for Open Access through your institution at no fee

Good News! Because you are affiliated with MAX-PLANCK-GESELLSCHAFT, fees to publish your article open access have already been paid through Germany's nationwide DEAL agreement. Therefore, confirm open access when asked. This will increase the visibility and impact of your research; the fees to publish open access are already covered and opting out of publishing open access would not save you or your institution money.

Your entitlement to open access publishing provided by DEAL, as corresponding author of the article, will be verified by the institution selected above. Please ensure your institutional affiliation here matches the one in your proofs, ahead of publication.

Visit the [Projekt DEAL Agreement](#) page for more information.
